- Received 40th place nationally in 2013, out of 1938 teams.
- Received 64th place nationally in 2014, out of 3185 teams.

PROJECTS

YHack: Created Metropolis, an algorithm that took 2D sketches and transformed them into 3D spaces traversable in VR.

Audible Hackathon: Developed an algorithm that dynamically increased or decreased the length of the white space between words in an audiobook, preserving the fidelity of speech while increasing the speed at which the audiobook could be heard.

Shravya Core: Developed a job board for NYU students to easily find jobs, a bot to grow Instagram and Twitter followers and engagement, a script to automatically invite Facebook friends to like pages or events based on their activity on the site, and a script to increase LinkedIn the size and reach of a user's LinkedIn Network.
